

COMBUSTION AND EXPLOSION

[GORENIE I VZRYV (MOSKVA)]

Vol. 19 No. 2 Year 2026

Editor-in-Chief S. M. Frolov

In this issue:

Fire and explosion hazard of accidental hydrogen releases in rooms and in an open space Yu. N. Shebeko	3
Comparative study of soot formation during pyrolysis of ethylene and propylene mixtures A. R. Akhunyanov, P. A. Vlasov, V. N. Smirnov, Yu. A. Krovyakova, V. S. Arutyunov, and D. I. Mikhailov	14
Numerical simulation of premixed $\text{NH}_3/\text{CH}_4/\text{air}$ flame structure and NO_x formation using detailed chemical kinetic mechanisms D. A. Slastnaya, M. Yu. Hrebtov, and V. M. Dulin	23
Initiation of filtration gas combustion waves during operation of attached flame arresters E. V. Manzhos, A. A. Korzhavin, and Ya. V. Kozlov	35
Influence of air suspension flow parameters on flame propagation velocity and limits A. G. Egorov	46
Influence of the environment and method of supplying mixed fuel on the composition of flue gas during combustion D. M. Golovko, K. Yu. Vershinina, D. S. Romanov, V. V. Skoryupin, and P. A. Strizhak	56
An optical pyrometry study of the size evolution and temperature kinetics of condensed-phase flying particles in sapphire laser ablation products D. Sidelnicov, M. N. Larichev, and G. E. Belyaev	67
Biochar gasification with steam and carbon dioxide: A review S. M. Frolov	77
Steam and carbon dioxide gasification of sunflower seed husks by gaseous detonation products S. M. Frolov, V. A. Smetanyuk, I. A. Sadykov, K. A. Avdeev, A. S. Silantiev, P. O. Vinogradov, Ya. S. Dudko, A. B. Vorob'ev, A. V. Inozemtsev, J. O. Inozemtsev, J. K. Hasiak, F. S. Frolov, A. V. Evlanov, and M. I. Molodid	107
Study of distributions of quasi-periodic nanostructures D. A. Antipov, E. V. Barmina, P. S. Kuleshov, and A. S. Lulushkina	124
Ballistic and rheological characteristics of an energetic composite based on ammonium perchlorate and thermoplastic polymer matrix A. A. Nazarova, L. K. Aristarkhov, V. A. Safronova, K. A. Monogarov, and A. N. Pivkina	142
Mathematical modeling of powder materials based on $2\text{Ti}-\text{Al}-\text{C}$ obtained by free self-propagating high-temperature synthesis compression L. S. Stelmakh, A. M. Stolin, P. A. Stolin, and P. M. Bazhin	148
Application of compact thin-film resistance thermometers in bomb combustion calorimeters A. V. Inozemtsev, J. O. Inozemtsev, T. S. Kon'kova, E. A. Miroshnichenko, Yu. N. Matyushin, and A. B. Vorob'ev	159
