COMBUSTION AND EXPLOSION
[GORENIE I VZRYV (MOSKVA)]

Vol. 19 No. 3 Year 2026

Editor-in-Chief S. M. Frolov

In this issue:

Application of the absorption spectrometry method to study the high-temperature oxidation of diethyl ether
N. S. Bystrov, A. V. Emelianov, E. S. Kurbatova, and P. I. Yatsenko 3

Partial oxidation of a model biogas mixture under adiabatic compression conditions
I. V. Bilera 11

Analysis of optimal conditions for oxidative pyrolysis of ethane to ethylene in a flow reactor with a laminar flow regime
M. G. Bryukov, A. A. Belyaev, and V. S. Arutyunov 22

Influence of thermophysical properties of the channel wall material and initial gas mixture temperature on the combustion process in a slot burner channel
N. Ya. Vasilik, A. A. Belyaev, A. V. Arutyunov, A. A. Mikhailov, A. D. Starostin, and V. S. Arutyunov 29

The influence of chemical bond parameters in an inhibitor molecule on the efficiency of gas-phase combustion suppression
S. N. Kopylov, P. S. Kopylov, I. A. Teterin, and I. P. Eltyshev 37

Experimental determination of the properties of a gas-permeable matrix made of compacted fechral wire
A. D. Danilov, V. D. Zatuliy, V. N. Smirnov, A. V. Nikitin, and V. S. Arutyunov 47

Transition to avalanche combustion activation as a method for enhancing an ejector pulsejet engine
G. A. Glebov, K. K. Migalin, and I. P. Boychuk 56

Thermodynamic analysis of detonation-assisted gasification of organochlorine wastes
S. M. Frolov, N. V. Apalkov, and F. S. Frolov 64

Steam–carbon dioxide gasification of microbial cell biomass with gas detonation products
S. M. Frolov, V. A. Smetanyuk, I. A. Sadykov, A. S. Silantiev, K. A. Avdeev, P. O. Vinogradov, Ya. S. Dudko, A. B. Vorob'ev, A. V. Inozemtsev, Ya. O. Inozemtsev, Ya. K. Hasiak, F. S. Frolov, A. V. Evlanov, and M. I. Molodid 91

Application of a cascade of neural networks for modeling detonation characteristics of high-energetic materials
V. S. Abrukov, D. A. Anufrieva, S. S. Kuzmin, and D. A. Sapyorov 106

Electric effect in energetic materials under impact loading
M. D. Krykin, R. V. Khatymov, D. I. Patrikeev, K. A. Monogarov, and A. N. Pivkina 115

Three-dimensional numerical simulation of gasless combustion modes during self-propagating high-temperature synthesis of ceramic–metal composites
S. A. Rogachev and A. S. Rogachev 122
